

DIGITAL LITERACY GUIDE

1

Awareness

Digital Literacy is more than just knowing how to use a smartphone; it is the ability to find, evaluate, and communicate information effectively. As a Student Ambassador, your goal is to use technology to solve problems, not just consume content.

2

Security

Create unique, complex passwords for every account and enable Two-Factor Authentication (2FA). Never share sensitive information like OTPs, addresses, or private photos with strangers. Protecting your data is the most basic form of digital literacy.

3

Presence

Start building a professional online presence early. Platforms like GitHub or LinkedIn are great for sharing projects and skills. Remember: what you post today can be seen by colleges and employers tomorrow. Be positive, be helpful, and be professional.

4

Critical Thinking

A true Digital Ambassador stops the spread of misinformation. Always fact-check news from multiple credible sources. Think critically about why a post was created—is it to inform you or to manipulate you? When in doubt, don't spread it.
